$\qquad$
Part I - The Theory
Directions: For each of the transactions below, record both the "Debit" and "Credit" for each country. You must also decide if the transaction belongs in the "Current Account" or a "Capital Account". To prove that debits equal credits, the balance of payments should equal zero.
[a.] Alpha buys a graphing calculator from Omega for $\$ 50$.
[b.] Omega downloads a movie from Alpha for $\$ 5$.
[c.] Alpha immigrants send $\$ 100$ back to Omega relatives
[d.] Alpha corporations pay $\$ 20$ dividends to Omega stockholders.
[e.] The Alpha government sells $\$ 75$ in bonds to Omega.
[f.] Rouge Omega investors buy Alpha junk bonds for $\$ 15$.
[g.] Alpha investors receive interest payments from Omega Government of \$10
[h.] Alpha businesses borrow $\$ 65$ from Omega Banks.

## Part II - Individual work

Directions: For each of the transactions below, record both the "Debit" and "Credit" for each country. You must also decide if the transaction belongs in the "Current Account" or a "Capital Account". When all of your transactions are completed, make sure the sum of the Current Account and Capital Account equals zero.
[a] Omega buys $\$ 80$ of agricultural products from Alpha.
[b] Alpha charities donate $\$ 20$ to flood victims in Omega.
[c] Alpha receives $\$ 10$ in interest payments for ownership of Omega junk bonds.
[d] Alpha residents buy $\$ 90$ in Omega stock.
[e] Higher interest rates in Alpha attract an inflow of \$20 from Omega.

| Alpha |  |  |  | Omega |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Current Account |  |  |  | Current Account |  |  |  |
|  | Debit | Credit | Net |  | Debit | Credit | Net |
| Exports |  |  |  | Exports |  |  |  |
| Imports |  |  |  | Imports |  |  |  |
| Trade Balance |  |  |  | Trade Balance |  |  |  |
| Investment Income Received |  |  |  | Investment Income Received |  |  |  |
| Investment Income Paid |  |  |  | Investment Income Paid |  |  |  |
| Net Investment Income |  |  |  | Net Investment Income |  |  |  |
| Transfers from the World |  |  |  | Transfers from the World |  |  |  |
| Transfers to the World |  |  |  | Transfers to the World |  |  |  |
| Net Unilateral Transfers |  |  |  | Net Unilateral Transfers |  |  |  |
| Current Account Balance |  |  |  | Current Account Balance |  |  |  |
|  |  |  | ===== |  |  |  | === |
| Capital Account |  |  |  | Capital Account |  |  |  |
|  |  |  |  |  |  |  |  |
| Capital Inflows |  |  |  | Capital Inflows |  |  |  |
| Capital Outflows |  |  |  | Capital Outflows |  |  |  |

| Balance of Payments |  |  |  | Balance of Payments |  |  |  |
|  |  |  | ===== |  |  |  | ===== |

## Part III - Conclusion

Check your work. Does the current account plus the capital account equal zero for Alpha? For Omega?
